Technology Informations

18 - 21 June 2025
Tehran - Iran

Message From Head of the Computer Trade System Organization of Iran

Digital economy means the future of the country.

Today, the digital economy is referred to as an alternative to oil. The emergence and rise of large cyber companies around the world is evidence of this, with some of them earning several times the annual income of Iran's oil in just one season.

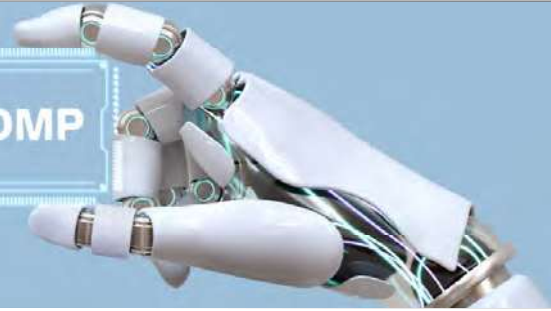

The important point is that the navigation and establishment of major global companies in the digital economy, due to the nature of technology, rapid changes, and the necessity of making quick decisions, have been carried out by the private sector.

In Iran, a multitude of digital, electronic, and intelligent services are offered and managed by private companies to millions of people, as well as governmental and ruling sectors. Therefore, unraveling the challenges and issues of the private sector in the field of the digital economy means accelerating the development of the country's future. In this regard, the Elecomp exhibition, as the largest digital economy event in Iran, provides not only a platform to showcase the capabilities of the private and governmental sectors, but also is an opportunity for top managers and decision-makers in the country to become familiar with the issues of this sector, with hopes for maximum utilization and beneficial exploitation of this event.

Ali Hakim Javadi
Head of the Computer
Trade System Organization of Iran

About Exhibition

International exhibition of
Electronic, computer & E-Commerce
Tehran-Iran

The 28th Iran International Electronic, Computer & E-Commerce Exhibition will be held between 18 - 21 June 2025, as the greatest commercial event in Iran's Market of Electronics and Computer Products and services.

ELECOMP is an exceptional opportunity to the activists of this sector inside the country and abroad, to boost their business through establishing strong business links with their counterparts and equip themselves with the proper gear to effective presence and in this huge market.

Since its first edition in 1995, numerous players of this stage in Iran introduce their latest achievements in software and hardware in ELECOMP every year. The event provides a unique opportunity to the activists of this sector to negotiate the possibilities of establishing new business and technological ties to boost their business and increase their share of this huge and ever growing market. The government of Iran which is potentially among the biggest customers of this market, especially because of its plans for deployment of Electronic Government, is strongly promoting presence of Iran's electronic and computer business in international scenes and markets.

And the last edition was held in the 50000 square meter area with the presence of 830 companies active in the various fields of this sector with foreign participant countries include: china, turkey, Korea, Russia, Germany, Italy and India.

Why You Should Attend Elecomp 2025?

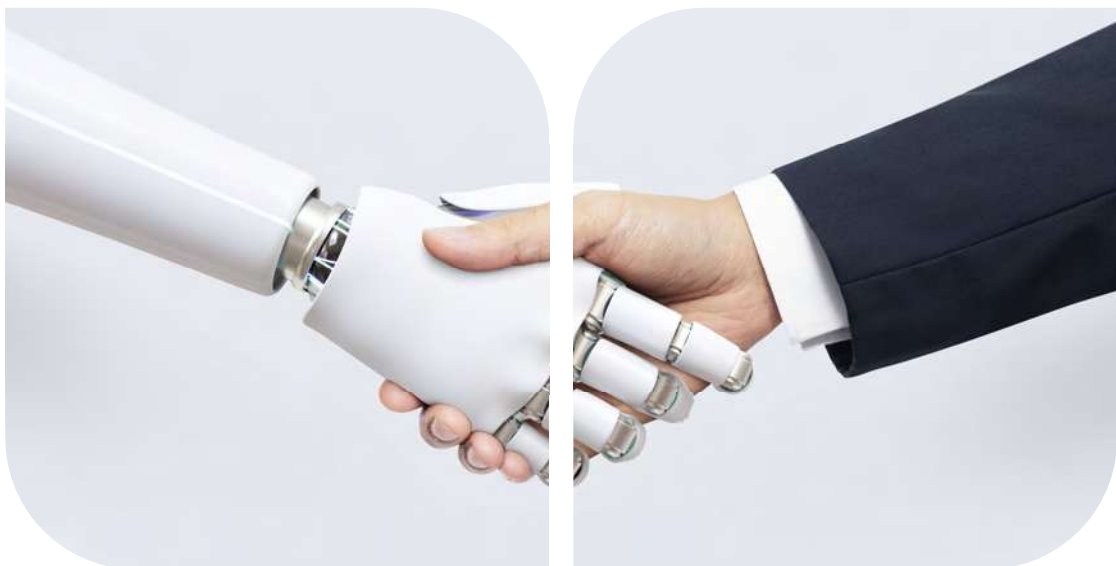

ELECOMP 2025 is the largest and most influential exhibition for electronics, computer technologies, and e-commerce in Iran. Participating in this event offers a unique opportunity to:

- Gain Market Exposure – Showcase your latest innovations to a broad audience, including top industry professionals, investors, and potential clients.
- Expand Your Business Network – Connect with key decision-makers, government officials, and international tech leaders to explore collaboration opportunities.
- Tap into a Growing Market – Iran's electronic and computer sector is rapidly expanding, supported by government initiatives like e-Government development.
- Global Presence – Join leading tech companies from countries such as China, Turkey, South Korea, Russia, Germany, Italy, and India.
- Stay Ahead of Trends – Discover emerging technologies in AI, cybersecurity, digital economy, and smart solutions through specialized zones like ELECOM TRENDS and ELECOM TALKS.

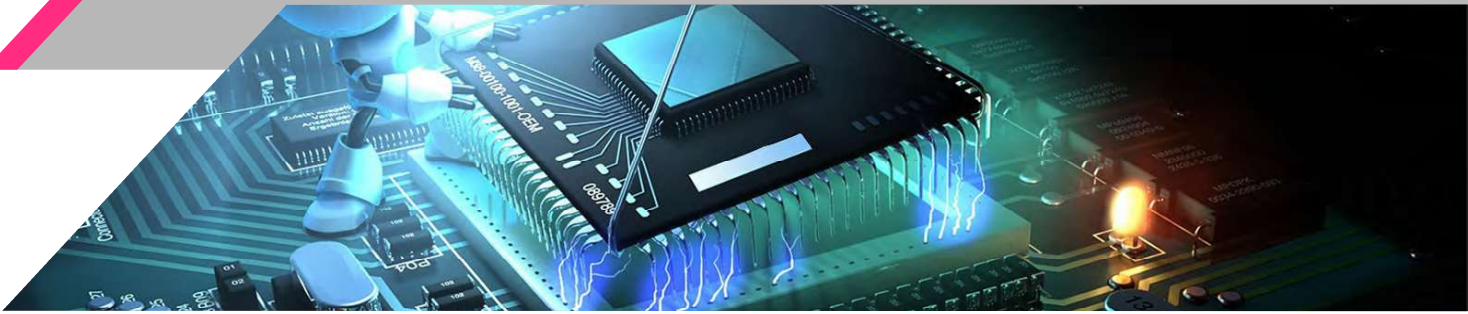

Benefits of Participating in Elecomp 2025

- Brand Visibility – Increase your company’s recognition in one of the most dynamic technology markets in the region.
- Lead Generation – Engage directly with potential buyers, partners, and distributors.
- B2B Opportunities – Establish strategic alliances and partnerships with key industry players.
- Showcase Your Innovations – Present your latest products and services in a professional setting, attracting attention from investors and stakeholders.
- Government & Institutional Support – Leverage strong backing from the Iranian government, which actively promotes the ICT sector.
